O1. INTRODUCTION.

Who we are and what we do.

INTRODUCTION

Dinger Token is the next generation of meme culture. We will kick off a revolution where an average person can gain access to launching meme tokens and creating their own unique environments that will help their memes succeed. We are centered around investor protection and are creating our suite of products with that in mind.

PROBLEMS & SOLUTIONS

We See The Problems In Crypto, And We Want To

Fix Them!

PROBLEMS

Meme tokens have taken the crypto market by storm. Unfortunately, the market is rife with scams, rugpulls, abandoned projects, and more, which hurts both those who invest in the project and also the reputation of the crypto market as a whole.

SOLUTIONS

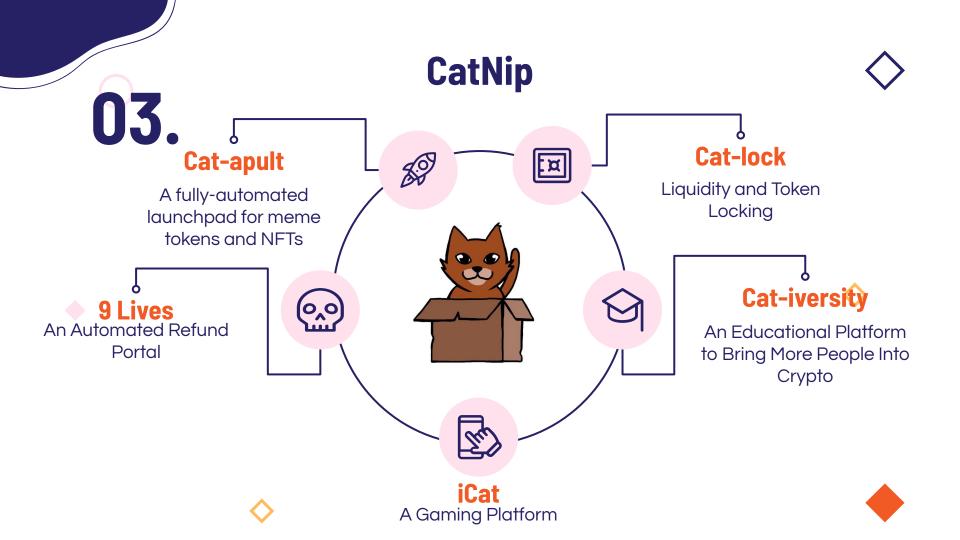

We believe that for the meme token market to truly thrive, change is needed. We want to build multiple products oriented around investor protection and ease of use and to foster the growth of a safer space for meme tokens and NFTs.

CatNip.

Our plans for groundbreaking development.

Cat-apult will be an automated, self-service launchpad for meme tokens and NFTs.

There will be many considerations taken for investor safety to limit any manipulation by both token launchers as well as investors. Additionally, safeguards will be put in place to spread out the release of funds to a team, limiting early abandonment of projects.

The Cat-apult platform will automatically add liquidity to the specified dex. After liquidity has been added, it will be locked on the Cat-lock platform. Additionally, any locks for team and vested tokens will be on the Cat-lock platform.

Cat-apult Insurance & 9 Lives

While Cat-apult can 100% guarantee that a launch will be safe from a rug pull, it cannot guarantee that a team will continue to work on the token that they have launched. To help mitigate this risk, Cat-apult will have a unique form of insurance for investors. Should the majority of token holders lose confidence in a project within the early phase of a project (the specific time frame is to be determined, they will be able to initiate the insurance/refund process. More details on Cat-apult insurance and the 9 Lives platform will be released at a later date.

03. What Will It Cost To Use Cat-apult

To launch a token on Cat-apult, there will be two options for payment - teams may choose to pay a fee in DINGER (amount to be determined) or Dinger can receive a portion of the eth raised (percentage to be determined). This fee will ensure that Dinger can maintain and upgrade the platforms. Any profits from Cat-apult will be used to benefit the Dinger token in some way.

Benefits For DINGER Holders

For any token launching on Cat-apult, the first portion of the sale will be reserved for people who have staked a minimum amount of DINGER for a certain amount of time. This will give DINGER holders a better chance at securing a spot in a sale as well as limit gas wars for popular projects.

Cat-iversity aims to help people advance their knowledge in crypto. Areas of education range from beginner to expert and will include

- Understanding Etherscan
- How to buy and sell on a decentralized exchange
- How to look for new listings
- Meme coin seminars/meme expo
- Advanced blockchain classes
- And much more

Beginners classes will be free to everyone, but advanced classes will require a payment in DINGER token. Additional forms of entry, including DINGER staking, may be available as well.

iCat

More details to come in a later whitepaper revision.

Redistribution

Shared between all holders of DINGER

Initial Token Distribution

04.

94%

of the token supply was initially added to liquidity and locked for 1 year

 \Diamond

6%

of tokens were given to those who provided initial liquidity

With every sale of DINGER for ETH, there will be two transactions on Dextools with the same maker address. One transaction is for the actual sale that the maker made. The other transaction is a sale of the accumulated tokens from the taxes. These tokens are sold for eth and then distributed to the developer and marketing wallets accordingly.

THANK YOU!
