COINRADR
WHITEPAPER

INTRODUCTION

The Crypto Market capitalization is now estimated to be over 2 Trillion Dollars. This exponential increase shows a fast-paced wave in adoption of crypto products. It is further estimated that more than 50 trillion dollars in fiat reserves will move into various crypto assets in the next few years.

The movement of fiat reserves into crypto has given rise to the birth of various DeFi products, Insurance, NFTs, Lending, Multichain, Metaverse and a whole ecosystem of interesting use cases.

However, the crypto space is experiencing chaos in its avalanche of activities and as technologies, use cases, ecosystems, tokens and coins evolve every day, we can only experience untimed eruption in these various packets of data points. If these data points are not aggregated properly, they can have negative impact on the crypto experience for both investors and traders a large.

THE PROBLEM

The problem of education in the crypto space cannot be ignore despite the vast information available. Information in the forefront is mostly feeding new users pipe dreams promising them fast financial independence which then robs them of the need to be properly educated. This fuels ignorance and a wrong perception by new users especially who do not know how to consume information from the basics and work their way up. This leads to lots of losses as crypto is then perceived and treated as a "get rich quick scheme". Crypto space is experiencing chaos in its avalanche of activities and as technologies, use cases, ecosystems, tokens and coins evolve every day, we can only experience untimed eruption in these various packets of data points. If these data points are not aggregated properly, they can have negative impact on the crypto experience for both investors and traders alike.
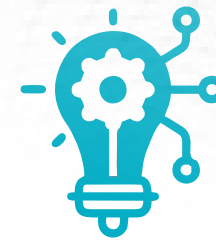

THE SOLUTION

Proper education of all users on every aspect of crypto will better crypto experience by users and foster a faster crypto adoption by people the world over.

COINRADR

A Revolutionary Encrypted Coin Tracking, Education & Trading App which gives crypto users an edge in the cryptocurrency market.

COINRADR INNOVATION

CoinRadr is the first comprehensive Blockchain-based DeFi solution to fully provide a complete all-in-one DeFi experience.

CoinRadr has a lot of amazing tools that provides a completely new experience & offers owners of crypto asset the following:

Coin Market Capitalization: this feature displays the prices of coins/tokens assets, 24 hours trading volume by exchanges, quantity traded, assets Market capitalization categories by asset types (deFi, Nft, metaverse, storage, multichain categories, meme coins)

3

Earn Daily Profit Yields: earn daily token rewards from app yields by performing specific tasks using the apps. It is also worth noting that a percentage of profits realized by the application from advertisements, subscriptions, etc. will be distributed to token holders. T&C apply.

High APY Alerts: grow your funds by plugging it to the highest and safest APYs from various pools on the decentralized exchanges.

Portfolio Analytics: displays the profit and loss status of individual assets in a seamless manner.

News Alerts: Instantly receive major and trending news from project teams and top media platforms.

Pump & Dump Alert: provides a novel algorithm to quickly detect pump and dump coins/tokens. This prevents loss in investment due to poor or misinformed decisions by traders & Investors.

Crypto Asset Analytics: a one-stop menu to view all features at a glance. This helps to easily spot a gem project, view coin/token health & get instant tip to aid investment decision.

Meme Tokens: memes provide a new wave of adoption. This category gives access to best trending meme coins by social engagement metrics & provide the market capitalization.

NfTs & Metaverse: track and view the hottest NFTs & Metaverse tokens.

New Listing Alert: Get to know about tokens/coins getting listed. Be in from the beginning and increase your chances for gains.

Trading Signal: provides day & long hodl gem coins/tokens signals from our team of experts. You can easily grow your funds by up to 1000% profits trading these signals.

Dapps Browser: connect to your offline wallets & get instant access to decentralized exchanges. You can perform token swaps and trade your favorite tokens.

Launchpad: Onboarding menu for incubator projects, seed rounds, private sales and public rounds. You can fund the best start-ups and get good returns on Investments.

News: Top trending news in the crypto space.

CoinRadr Socials: get the hottest crypto discussions & trending tokens from top influencers by their social engagements.
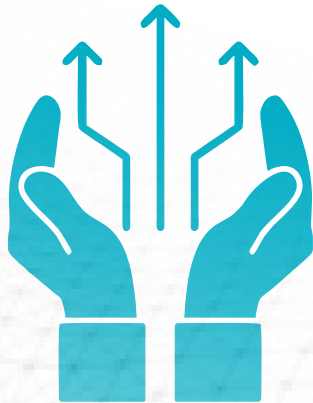

Whale Alert: know when the whales (biggest investors) are buying or selling off part or all of their holdings.

Import & Export Analytics Data: easily import your app details using the sign in profile features. You can create and sync your app customized settings. Export reports in supported formats.

Exchange Synchronization: CoinRadr also provides support for the top 5 exchanges with same sync speed and has an encrypted data that store user information securely. This feature is very much guaranteed due to CoinRadr design architectural inbuilt security. This model further represents a new design for the much requested user data safety.

OUR CORE ADVANTAGE

Messaging Security

Trading Flexibility

Cost Effectiveness

Data Security

Instant Trade

$RADR: OVERALL UTILITY & FUNCTIONS

- $RADR Token is the native currency of CoinRadr driving all its ecosystem utilities.
- It will serve as staking rewards for long term DPY rewards.
- It will drive all utilities for payments in using the dapp browser of the app. $RADR token will drive Launchpad listings & incubator subscriptions.
- Incentivized rewards in $RADR for APP users based on their activities and contributions to growth of the ecosystem.
- All NFTs and Metaverse utilities in the ecosystem will be driven using $RADR

COINRADR TOKENOMICS

The participants and decentralization of the ecosystem is key, hence the token distribution is designed to provide a long term governance and ecosystem oversight schedule.

The **TOKENOMICS** distributed according to the long term product development goals is captured as follows:

Total Supply 100M $RADR

Private Sale - 2%

Private Presale - 0.7%

Presale Round 1 (Public) - 3.6% (Pinksale)

Presale Round 2 – 1.5% (XPAD)
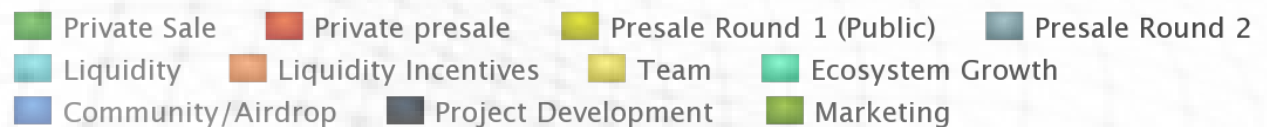

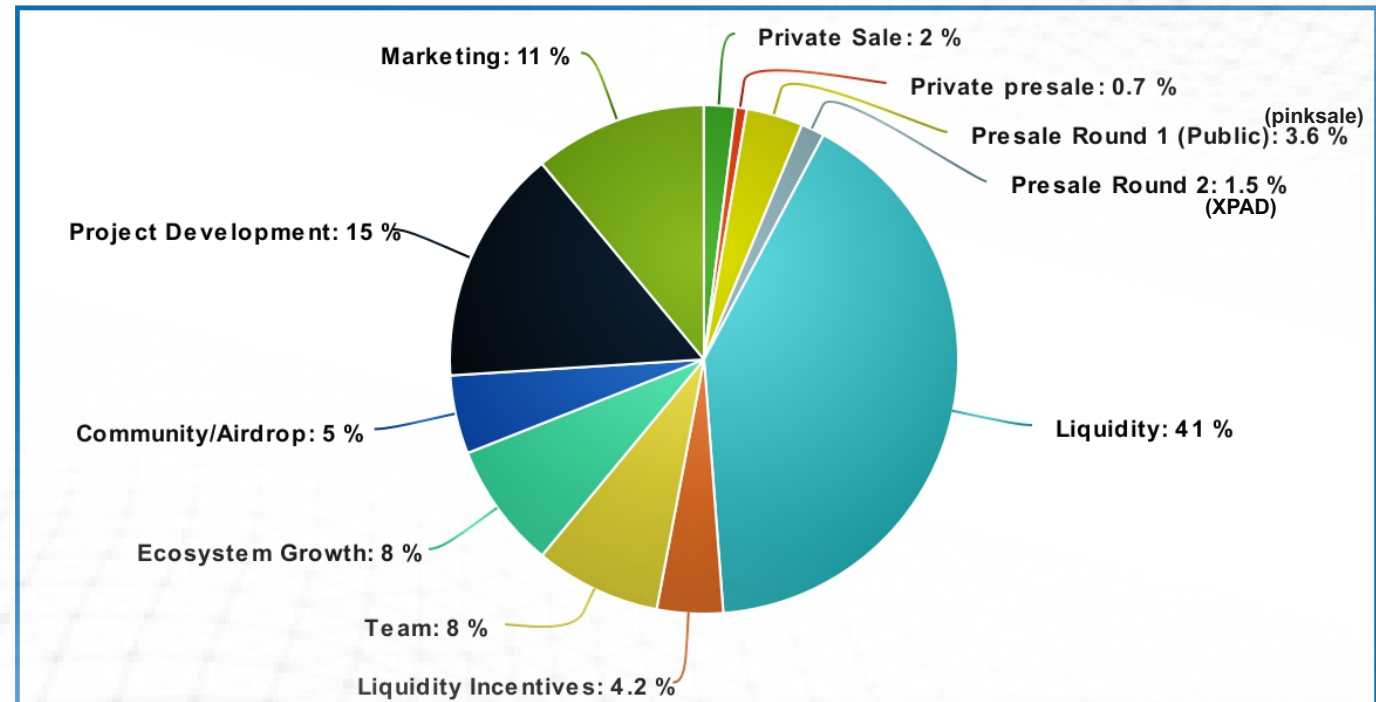

Liquidity 41%

Liquidity Incentives 4.2%

Team 8%

Ecosystem Growth 8%

Community/Airdrop 5%

Project Development 15%

Marketing 11%

TOKEN SALE METRICS

Token Name: **CoinRadr ($RADR)**
Total Supply: **100,000,000 Tokens**

Private Sale

2% of Total Supply
2M $RADR Tokens
Price: 1BNB - 20,000 $RADR

Private Presale

(0.7% of Total Supply)
700,000 $RADR Tokens
Price: 1BNB – 15,000 $RADR

Public Sale

5.1% of Total Supply
5.1M $RADR Tokens
Price: 1BNB - 12,000 $RADR

0.7%

■ Private sale
■ Private presale
