

Twinci

The First NFTs Social-Marketplace

TWINCI

Create, sell and collect digital items secured with blockchain

WHAT IS TWINCI?

+ **Twinci** is a decentralized NFTs social networking application on blockchain where you can create, sell, and collect digital products. You can receive an unlimited amount of money through the works that people drop a heart.

*Create, sell and collect
digital items secured
with blockchain.*

WHAT IS OUR GOAL?

Becoming the largest decentralized social network and sharing our profit with users.

- ⊕ NFTs creations cannot be tampered
- ⊕ All tradings are made transparent
- ⊕ Earn lifetime royalties from your products

For users:

- ⊕ User may collect works of their favorite artists
- ⊕ User may also trade and earn money from NFTs products

WHY BSC CHAIN?

1 Interoperability

BSC is built with a dual chain architecture, which makes it possible for users to enjoy the flexibility of transferring assets from one blockchain to another. The interoperability of BSC offers users the opportunity of accessing a vast ecosystem with a myriad of use cases. Interoperability is one of the key features held in high esteem by DeFi proponents, and BSC is at the forefront of making this possible.

2 Cheap Transactions

BSC and Ethereum are two of the most common blockchains of choice for DeFi projects. But when it comes to blockchain fees, BSC is substantially more cost-effective than Ethereum.

3 Transaction Speed

BSC, which is compatible with smart contracts for decentralized applications, is connected with the high throughput BSC to achieve shorter confirmation times and higher transaction processing speeds while being programmable.

VISION

Twinci Dapp aims to be a blockchain-based decentralized application that connects content creators (KOLs) with those who want to own the artworks. It's also to create an ecosystem for buying and selling digital products in which KOLs have permanent royalties and collectors can verify the origin of the products, and trade them to generate income.

WHAT IS TOKEN TWIN?

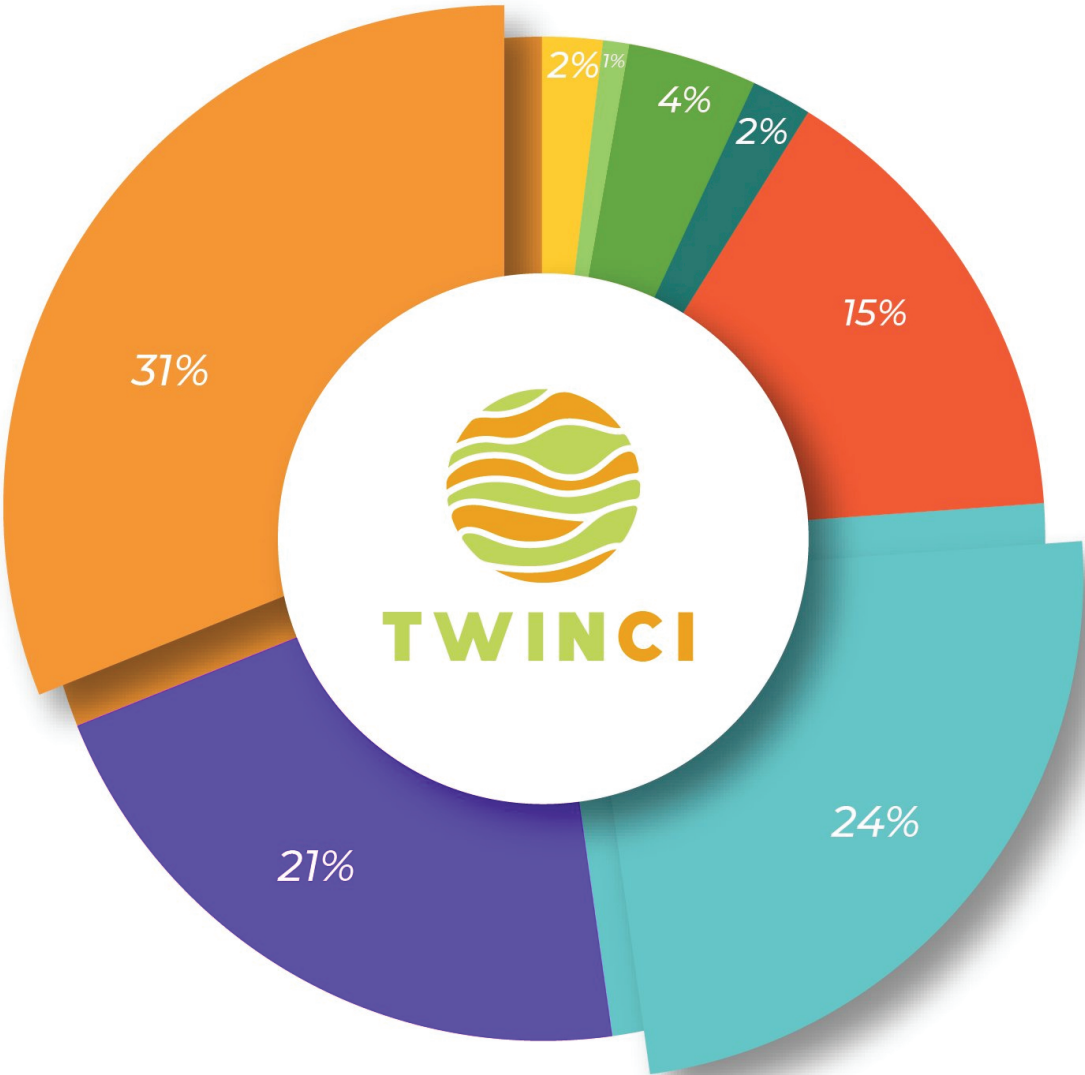

Twin is a Twinci token on the NFTs market. You can use Twin tokens to buy and sell NFTs products that you like, and you will receive a lot of special offers when using Twin tokens to pay. Profits from sharing revenue with art creators and collecting fees for Dapp's NFTs transactions will be burned quarterly, and the more active the NFTs market is, the less the total supply of NFTs will be. This helps the Twinci token to grow well. In the long term, the more popular the platform becomes, the more people want to hold shares as an investment, the business worths more and the token will be accepted for sale on the most major cryptocurrency exchanges in the world.

For digital art creators, owning more than 10 Twin tokens will enable them to create (upload) NFTs products.

And we believe that from 2020 onwards, digital art creation, buying and selling of NFTs products will occupy a large market share in the cryptocurrency market.

\$5.000.000 TWIN total supply

- IDO R1
- IDO R2
- Pancake Liquidity
- Retro Active airdrop
- Dev Team
Lock 365 day, unlock everyday
- Marketing & Partnership
Lock 365 day, unlock everyday
- Ecosystem Reserve
(unlock after 1 year)
- Farming & Staking

1	IDO R1	100,000	2%	
2	IDO R2	50,000	1%	
3	Pancake Liquidity	200,000	4%	
4	Retro Active airdrop	100,000	2%	
5	Dev Team	750,000	15%	Lock 365 day, unlock everyday
6	Marketing & Partnership	1,200,000	24%	Lock 365 day, unlock everyday
7	Ecosystem Reserve	1,050,000	21%	Unlock after 1 year
8	Farming & Staking	1,550,000	31%	

Twinci Roadmap

Q4/2020

Do research on NFTs market and its current problems, build the core infrastructure of NFTs social-marketplace.

January 2021

Build NFTs marketplace platform, testnet on Binance Smart Chain.

February 2021

Build NFTs community, airdrop token for the community to experience Twinci NFTs platform. Receive feedbacks and continue to optimize the user experience.

March 2021

- Mainnet on Binance Smart Chain
- Bounty Marketing
- Connect KOLs
- Appear on Dapp.com, Pancakeswap

April 2021

- Develop referral program
- Layer 2 on Ethereum
- Build global community

Q3/2021

- Build the platform of NFTs social-marketplace crosschain Binance Smart Chain - Ethereum
- Twinci ver 2.0

Q4/2021

- App on Smartphone
- NFTs payment available with Visa, MasterCard

2022

Continue to improve the platform to become Crypto's largest NFTs social network (like Instagram on blockchain).

THANK YOU
