

ABSTRACT

Lately digital work ownership assets such as photos, videos, and other works in a form of Non-Fungible Token or NFT. The NFT works for sale will be registered in blockchain. Blockchain is a digital big book with networks that support ETH, BTC, BNB and other crypto currencies. Now days NFT is not only used to sell digital assets but also get into gaming world which is used by gamers to get more income through NFT game, as known as play-to-earn , where the NFT gamers collect their game assets or prizes will be converted into real money.

Now days, there are lot of NFT categorized games. Poomoon is one of a new game that carry mining theme and introduces blockchain feature to its players. Players can also buy and own mining gear. Players can produce, trade and save their poomoon token from mining. Poomoon is inspired by a successful game Animal Crossing which is also a mining game. The game creator guarantees the Poomoon is friendly to newbie players. Poomoon gives a fun experience with good mining eco-system fo players who like to collect and trade NFT, though they do not understand what NFT is.

Poomoon is created to give a new sensation for player in game and also to change the bad stigma among people about which they are love to spend their time and money for nothing. The main focus of the creator is to introduce this game to all gamer and develops its features so Poomoon is able to give the best for player and competes with others.

POOMOON INTRODUCTION

Game overview

Welcome to Poomoon world, a big island complex located in Limoxy Islands. Limoxy is a place where Poomoon as a buried Limoxy people precious treasure. Player can find the treasure by joining seeking treasure, which is by having some squares of ground for gaming activities such as, trading, mining, and upgrading.

Player is able to completely experimenting by using strategy of ground picking, updating mining gears and character for maximum mining. The effort of developer to create this game is perfecting the plot so player will be interested and play the game for long time. Only players can do everything about their mining.

Business Aim

Poomoon is the first mining game that engages on blockchain to give different mining experience to players. Developer compares Poomoon with common normal game which is very common without giving any reward. Developer tries to give a multiple fun to player by gaining some reward. Developer tries to reach more player than the previous blockchain game by giving them interesting system and game in order to gain more chance and income.

Market and Audience target

Regarding the data of game strategy that mentioned before such as interesting and unique graphic style, updated ideas that added into the game, and friendly governance, developer decide the aim are.

With unique mining style that does not take much time, developer believes that the game can compete in game market. Reach million mining player especially player that has no experience and interest in world of blockchain or crypto currency. Developer fully purposes to develop the potency of blockchain economy while abstracting the complexity to the player.

Developer has made analysis of target market which old man and even businessman can play the game. The result of analysis proves that the game can be played by people who do not have much time. There are some aspects that make this game is better.

- Developer appreciates player real life activity, so this game does not need much time to be played but still profitable.
- We start the game when NFT games are on trend.
- First interesting mining game that connects to blockchain.
- Mining style is identified unique. The game is easy to be remembered and played with good strategy.
- Blockchain infrastructure is “hidden” with easy used and played technology.

Developer owns strong determination and planning in the future which Poomoon will be a big game with significant profit in blockchain sector.

✍ Main Game Feature

One of the main feature of this game is virtual market where players are able to do unlimited trading Poomon and items such as mining gear support with their own strategy.

Miners can upgrade their heroes and gears to buy the next gears in game. It will improve their mining into maximal.
