

ZFM-Coin

WHITEPAPER

ZFM-Coin Are?

ZFM COIN is a Binance Smart Chain based Token, with burn function, high security, low fees, fast transaction and eco friendly. ZFM COIN Cross-chain Asset Locked by Smart Contract. Data Security Safeguarded by Binance Smart Chain. ZFM-Coin also collaborates with non-profit marketplaces (NFT Marketplaces). In the present cryptocurrency and NFT frenzy, ZFM-Coin (ZFM) is a Binance Smart Chain that is built on the cryptocurrency and NFT craze. ZFM Coin is a platform based on the Binance network promoting the culture of Banking through the universe of ZFM. All current NFT in which the user is integrated into centralised economies will move their emphasis away from Tokens and assets and toward alternative Tokens and assets because of ZFM economy. Binance network in ZFM is used to facilitate transactions and maintain network stability. Everybody's favourite memories have been packed by ZFM Coin, and you may trade them, take them, or cultivate them for long-term investment and profit and use as your payment option.

Our Goals

ZFM COIN supports connection to each blockchain network, fragmented centralized system and participating entities and enables support for and connection to business scenario. As a hub for exchanges of values, the ZFM COIN combines cloud computing, big data, and artificial intelligence to provide perfect support for business scenario. See the network application chapter for more details on the application of the ZFM COIN in some business areas.

Our Vision

ZFM-Coin vision is to make a Digital Banking system with AI and all digital feature with low gas fees, instant payment gateway, no hassle, automatic system. Also we are working in NFT marketplace and more crypto sectors.

Ecosystem

ZFM COIN, (also referred to as “ZFM COIN” or “ZFM”) is a new-generation of underlying blockchain network. ZFM originates from ZFM COIN, a symbol that represents the birth of “Five Times Interlacing”, explores the cause and effect underlying everything, and goes after the development history and results of intertwined networks with a view to pursue a desirable blockchain world in the future.

Reward Mechanism

ZFM-Coin also offers a customer incentive programme that is based on how well clients interact with the local community and transaction. Users who will use ZFM-Coin, they will receive a reward for per transaction.

Opportunities

The ZFM COIN supports connection to each blockchain network, fragmented centralized system and participating entities and enables support for and connection to business scenario. As a hub for exchanges of values, the ZFM COIN combines cloud computing, big data, and artificial intelligence to provide perfect support for business scenario. See the network application chapter for more details on the application of the ZFM COIN in some business areas. Even though ZFM COIN Core currently runs on all the above configurations as a pure dApp, we have ultimately implemented the native ZFM COIN app with an Electron wrapper for its intuitive installation and familiar user interface.

ZFM-Coin Holders can be use ZFM as their payment solution to buy any goods as they want, earn benefit for holding, staking and transactions.

DEX Swap

Decentralized exchange (DEX) is a peer-to-peer (P2P) marketplace that connects cryptocurrency buyers and sellers. In contrast to centralized exchanges (CEXs), decentralized platforms are non-custodial, meaning a user remains in control of their private keys when transacting on a DEX platform.

ZFM Developing a Platform Decentralized Exchange, It will be use for Swap any kind of token, Payment through the ZFM Gateway and it will be link to ZFM Platform.

ZFM Decentralized exchanges (DEX) are a type of cryptocurrency exchange which allows for direct peer-to-peer cryptocurrency transactions to take place online securely and without the need for an intermediary.

Staking

ZFM-Coin utilises the Binance platform, which is eco-friendly and sustainable and employs a proof-of-stake algorithm. Binance is not only the largest cryptocurrency exchange in terms of trading volume, but it also offers superior staking services. By employing superior security techniques and providing a Secure Asset Fund for Users, BSC ensures the safety of user funds (SAFU). At the time of writing, our staking method is unquestionably one of the most secure and environmentally friendly ways to generate passive income with ZFM-Coin. The platform stores all staked tokens using a secure wallet and a mechanism for double-checking.

As more people, especially institutional investors, recognise the lucrative nature of the cryptocurrency market, ZFM is quickly becoming a passive income-generating strategy by simply holding or locking assets in a wallet.

ZFM staking systems are advantageous for allowing investors, including those without a technical understanding of cryptocurrencies, to stake proof-of-stake (PoS) tokens and earn rewards, because staking cryptocurrencies requires particular crypto-technical knowledge and compliance norms.

The staking network provides you the necessary skills and information and authenticates your wagers for a modest percentage of your staking earnings, allowing you to earn enormous returns. In response to the explosive growth of crypto staking, staking platforms that enable investors to collect staking rewards have emerged. Therefore, if you wish to earn a passive income through Staking, you should be here.

Benefits of ZFM

- **No hardware is required**
- **Low Gas Fees**
- **Scalability**
- **Instant Payment**
- **AI Feature Included**
